

Runway Prompt Anchoring A/B Test: Control vs Strong Anchoring

Experiment Goal:

Does adding explicit detail preservation instructions improve garment fidelity?

- **Control:** Standard prompts with garment mentions
- **Strong Anchoring:** Adds explicit instructions to preserve exact cuts, lengths, silhouettes from reference images

What to Look For:

- Are skirt lengths preserved correctly? (check midi vs mini)
- Are trouser cuts accurate? (wide-leg vs straight)
- Are patterns maintained? (houndstooth, stripes)
- Are accessory details correct?

Sage skirt + black tee + cream boots

 Critical details to check: Sage skirt should be A-line midi length, cream boots should reach knee-height

Version A: Control

Version B: Strong Anchoring

Generated in 27.1s

Generated in 24.6s

Standard prompts with garment @mentions

Added explicit detail preservation instructions:
"Preserve exact cut, length, silhouette from
reference images"

Pink cardigan + houndstooth trousers + loafers

 Critical details to check: Houndstooth pattern should be preserved, trousers should be wide-leg

Version A: Control

Generated in 27.0s

Standard prompts with garment @mentions

Version B: Strong Anchoring

Generated in 27.1s

Added explicit detail preservation instructions:
"Preserve exact cut, length, silhouette from
reference images"
